

PUNCH NEEDLE TOTEBAG TEMPLATE

Simply print out and place the pattern on a backlit glass window, trace the design with a permanent marker onto the inside of your totebag. You can also trace the design directly from your computer/phone screen, just make sure to adjust the size of design so it fits inside the embroidery hoop. I encourage you to mix and match the shapes and their placements on your bag to create an interesting composition and one-of-a-kind bag.
